

Dec-Scupper

WATERPROOFING ENSURED

THE PRODUCT ADVANTAGE

The Dec-Scupper is the ideal through wall drain to use with Dec-Tec membranes. DecScuppers have a PVC coated flange to which the membrane is heat welded to ensure waterproofing. The one-piece construction makes it easy to install and the rigidity of the scupper allows on site workability to be increased. The Dec-Scupper is available in three diameter options.

FEATURES:

- Solid one-piece design eliminates potential leaks within the scupper
- Can heat weld membrane directly to flange
- Three diameter options:
 - 1-7/8" - no slope
 - 2" - 10% slope
 - 3" - 10% slope

PACKAGING:

- Sold in single units

MAINTENANCE:

- Keep outlet clear of debris
