**COOLSTEP SANDALWOOD**  
80 mil

## THE PRODUCT ADVANTAGE

With our CoolStep Line, Dec-Tec brings single-ply cool roof principles and technology to flat roof pedestrian areas with a walkable, reflective membrane. Unlike liquid applied coatings, Dec-Tec won't crack, peel, or wear away.

Coolstep is designed with warmer climates in mind and can keep you walking comfortably on your deck any time of year, perfect for barefoot use! In bright and neutral tones, Coolstep looks stunning in a multitude of applications.

Protect your building and extend the life of other building components by eliminating moisture intrusion and reduce energy cooling costs. All in an attractive, easy, and cost efficient installation that will withstand even the harshest weather conditions... summer or winter!

## FEATURES:

- High Solar Reflective Index
- Spread coat construction eliminates delamination
- Non-directional Fiberglass Core
- High Traction – Slip Resistance
- Excellent vinyl to vinyl weldability
- 20 year limited warranty on 80 mil membrane
- Widest membrane on the market at 76"
- Complemented by a full line of color coordinated system accessories
- Low maintenance

## PACKAGING:

- Master rolls at 76" x 600'
- Cut to length
